

**PNS SCHOOL OF ENGINEERING
BRANCH- CIVIL ENGINEERING
SEMESTAR-5TH
SUBJECT-PWP{PROJECT WORK}
NAME OF THE FACULTY-SUDEEPTA MISHRA**

1ST	OBJECTIVE
	Implement the theoretical and practical knowledge and skills gained through various subject into an suitable for real practical working environment ,preferably in an industrial environment.
2nd	develop civil engineering knowledge and application in implementing tyhese for the actual needs of the community .
3rd	qualitative analysis of any one or more of the civil engineering materials by addition or alteration of one more constituents to asses their suitability as construction material.
4th	Experimental investigation of behavior or stuctural element.
5th	preparation of innovative structural model by use of material having close resemblance to real life structures.
6th	Analysis ,design and estimation of civil engineering srtructure use of software for execution of project may be encourage.
7th	planning,testing and enhancement using differient available materials.
8th	soil, properties enhancement using differient available material.
9th	development of waste disposal system including e-waste.
10th	traffic volume studies and congestion solution.
